

Premium Automotive Film Out-performs Standard Films for IR Rejection

- Strong profit generating potential with fewer installs
- Superior visual acuity
- Available in 7 shades from 10 to 90%
- Extreme IR heat rejection even with high visible light transmission
- Non-metalized so it won't interfere with today's automotive technology

Offers drivers a high-heat rejecting, premium window film without the look of dark tinted glass. With a full VLT range, there is a film for every driver.

Film VLT	IR Rejection	Heat Rejection	Glare Reduction
10%	91%	63%	88%
20%	90%	59%	75%
30%	91%	57%	63%
60%	91%	49%	26%
70%	89%	45%	17%
